

Lab Companion

▶ **Temperature cycling test chamber SE-150-15**

Custom Solution

▶ **Brief Introduction**

Temperature cycling test chamber is suitable for instruments, chemistry, plastic, electronics, food, clothing, vehicles, metal, chemical, building materials, aerospace and other parts or machine. With rapid temperature change, gradient adaptability test and temperature stress screening test functions, helps to test the performance and change under the proposed conditions, for the purposes of product design,

Lab Companion

improvement, identification and factory inspection.

Particularities:

1. The structure design of the Test Chamber is advanced and reasonable, and the supporting products and functional components have the international advanced level, which can meet the long-term, stable, safe and reliable production needs.
2. It can apply temperature stress and realize the change rapidly between the desired temperature values (such as -45~ +100°C temperature range, the lifting temperature rate is 15°C/min).
3. It adopts the perfect modeling design, the appearance has excellent texture and beautiful atmosphere.
4. The control system adopts special control system, with strong expansibility, simple operation, accurate control.

Technical Features:

| Dimensions (mm) | Width | Height | Depth |
|------------------------|--------------|---------------|--------------|
| Useful | 500 | 600 | 500 |
| Overall | 770 | 2030 | 1720 |

Temperature range
from -60°C to +150°C

Homogeneity and Regulation:

Temperature fluctuation:

≤±0.5°C

Temperature deviation:

≤±1.5°C

Temperature uniformity:

≤2°C

Temperature change rate:

15°C/min (-45°C→ +100°C) Measurement of control points in the air intake area under no-load condition with linear temperature rise and fall throughout the entire process.

Lab Companion

Appearance Introduction and Description:

1. Front and side of the machine

| Number | Name | Illustration |
|--------|--------------------------|---|
| 1 | Tower Light | Green light-operation Yellow light-standby Red light-alarm |
| 2 | Over-temperature setting | Set the upper temperature limit in the test zone |
| 3 | USB interface | Used to copy the curve or the document-related data |
| 4 | Emergency stop switch | For equipment connection, cut off the power supply |
| 5 | Network interface | The computer and the controller can be connected remotely through the network cable |
| 6 | Test hole | Product live test can access the external power supply from the test hole |

Lab Companion

| | | |
|---|---------------|---|
| 7 | The door lock | Pull the vertical door to open it |
| 8 | Glass window | To observe the inner workings of the laboratory |

2. Control panel

| Number | Name | Illustration |
|--------|------------|--|
| 1 | Controller | Touch screen programmable controller (Refer to controller manual) |

Lab Companion

3. Test area

| Number | Name | Illustration |
|--------|---------------------------|---|
| 1 | Thermal resistance sensor | Used for panel overtemperature sensing the temperature of the inner chamber |
| 2 | Thermal resistance sensor | Used for the controller to sense the temperature of the inner chamber |
| 3 | Air outlet | Test area circulates air outlet |
| 4 | Sealant | Heat preservation and air leakage prevention |
| 5 | Sample rack track | Used to secure the sample holder |
| 6 | Sample holder | Used to place test products |

Lab Companion

4. The cooling machine room

| Number | Name | Illustration |
|--------|--------------------------------|--|
| 1 | Fluid reservoir | Storage refrigerant |
| 2 | Compressor | Compression refrigeration |
| 3 | Oil extractor | Separate refrigerant and refrigerant oil |
| 4 | Pressure protection controller | When the pressure is too high, the machine will give the alarm |

Lab Companion

5. Power distribution room

| Number | Name | Number | Name |
|--------|---|--------|------------------------|
| 1 | Temperature controller | 9 | Thermostat |
| 2 | Auxiliary relay | 10 | Thermal overload relay |
| 3 | Ultra temperature plate | 11 | Power regulator |
| 4 | Under-voltage and Reverse-phase Protector | 12 | AC contactor |
| 5 | Fuse | 13 | DC power supply |
| 6 | Auxiliary contact | 14 | Solid-state relay |
| 7 | Large current terminal | 15 | Time relay |
| 8 | Connector terminal | | |

Lab Companion

Test Report:

| Temperature °C sensor | -60°C | -20°C | 0°C | 40°C | 85°C | 125°C | 150°C |
|---------------------------|-------|-------|-----|------|------|-------|-------|
| 1 | -60.0 | -19.8 | 0.4 | 40.4 | 84.8 | 124.6 | 149.8 |
| 2 | -59.8 | -20.0 | 0.2 | 40.2 | 85.0 | 124.8 | 150.0 |
| 3 | -59.6 | -20.2 | 0 | 40.5 | 85.3 | 125.1 | 150.1 |
| 4 | -59.4 | -20.4 | 0.2 | 40.7 | 85.5 | 125.3 | 149.7 |
| 5 | -59.7 | -20.6 | 0.4 | 40.6 | 85.2 | 125.4 | 149.9 |
| 6 | -59.9 | -20.8 | 0.7 | 40.8 | 85.3 | 125.2 | 150.1 |
| 7 | -60.2 | -20.6 | 0.9 | 41.0 | 85.6 | 125.0 | 150.3 |
| 8 | -60.4 | -20.7 | 1.0 | 41.1 | 85.7 | 125.4 | 150.5 |
| 9 | -60.6 | -20.5 | 1.3 | 41.0 | 85.9 | 125.6 | 150.2 |
| Temperature departure | 0.6 | 0.8 | 1.3 | 1.1 | 0.9 | 0.6 | 0.5 |
| Temperature uniformity | 1.2 | 1.0 | 1.3 | 0.9 | 1.1 | 1.0 | 0.8 |
